

Cost Basis Steering Committee Meeting

Minutes

April 3, 2012, Noon – 2 p.m.

I. Approval of March 27, 2012 Meeting Minutes

- The committee approved the minutes as written.

II. Issues discussed

- New Master File requirement: The group discussed the new Master File functionality, the 'alternate number' field. Lydia provided the example below as a basis for discussion:

Account ID	CBRS Account Name	Firm ID	Firm Type	Date	Exempt	Alternate ID	Alternate Type
0000A001	CBRS TEST 1	8608	DTCPRT	9/1/2010	N		
0000A002	CBRS TEST 2	8610	DTCPRT	9/1/2010	N		
0000A002	CBRS TEST 2	8610	DTCPRT	9/1/2010	N	1234	DTCPRT

The example above should work, with an addition: the group decided on adding another column to indicate whether the record is the parent or the child. Lydia will prepare a more extensive example for next week's meeting, including examples for CBRS-only accounts. Lydia will also discuss this design with DTCC's development team, and report back to the committee with any questions or comments from the team.

- Derek brought up the examples of scenarios when a CBRS user could send a paper statement to another CBRS user. Some firms have not been able to program to CBRS for all situations, such as the need to send a lone CBRS record after the clean-up of a break in a mutual fund transfer. These situations are a small subset of cost basis processing, but they do happen daily. This is an open issue, which may take some time to work out as various cost basis-related issues are worked out and programming resources are available.

III. Next Meeting: Tuesday, April 10, 2012, Noon – 2 PM eastern

Future enhancements for November 2012 release (agreed upon by the Committee)

1. Require Tax Lot Current Cost for options (Asset Category = OPT)
2. Warrants and Rights (Asset Categories WAR and RGT) should have rules similar to Equities (EQU)
3. Add an edit that the Deliverer Customer Account Number and Receiver Customer Account Number should be required for Transaction Type 56 = Networking Transaction.
4. Passing cost basis for a security that has undergone a mandatory cash reorg. Scenario: A CBRS record submitted by a broker-dealer was system rejected last week. It was a record sent from the B/D to a transfer agent, on a security that had undergone a mandatory cash reorg on 11/28/2011. CBRS put TA # 00008 on the record, a DTC internal TA number used for reorg'ed securities, and system rejected the record back to the B/D. CBRS may be able to put the old TA number on the record.

Parking Lot

1. **Fixed Income related issues/questions:**

- Both Original and Current Cost may be required for fixed income assets.
- Either both Yield and Date you're amortizing to should be required, or neither, but not just Yield.
- Indicator for Equity-based Compensation Arrangement. Also, purchased with a compensation related option: what asset category should the submitter use?
- Adjusted issue price of the debt instrument as of the transfer date may be necessary
- Amortized amount
- Payment frequency
- CBRS may need to be able to pass an amortization/accretion table.
- CBRS may need four new fields: 1) Original Issue Discount/Premium; 2) Indicator to say whether the value is a discount, premium, true zero, or unknown; 3) Market Discount/Premium; 4) Indicator to say whether the value is a discount, premium, true zero, or unknown.
- What should be the Transfer Control Number for Fed items? The 'Fed Reference Number?'
- How should Transaction Type 06 = Other Depository Deliveries (e.g. FED) be used? What fields should be required for this type? What fields need additional rules for this type? What fields need Best Practices for this type?

2. **Should the Receiver Customer Account Number be required for Conversions?**

3. **Enhancement for Exempt Recipient Accounts Indicator.** Provide three categories on the master file, from which a user could choose what kind of basis it wants to receive. Categories: 1) send all basis; 2) send everything except retirement accounts; 3) send no non-covered accounts (CBRS could systematically edit to this option). The committee will revisit this issue after the existing version of the Exempt Recipient Accounts Indicator has been in place for a few months; and after committee members have had the opportunity to research the issue and quantify the cost of records sent and received for non-covered non-retirement accounts.

4. **Default format for Transfer Control Number for foreign asset transfers (Transaction Type 06 = Other Depository Deliveries).** There are two proposed formats for TCN for foreign asset transfers: Julian date (3 bytes) + sequence number (3 bytes) + CUSIP (9 bytes) + deliverer account number (15 bytes) [or receiver account number if deliverer account number is not available]; or the "D format" follows the format below:

- Position 1: 'D' = Direct Transfer Indicator
- Position 2-5: NSCC Participant Number for the Fund
- Position 6: Last Digit of Current Year
- Position 7-9: Julian Date
- Position 10-15: Unique Number (randomly-generated, sequential)

A primary difference in these formats is their length: the 'D' format is 15 bytes, the first format ('Kevin's format') is 30 bytes. How will deliverer/receiver agree on the TCN?

5. **How should Transaction Type 07 = Physical Movement Settlement be used?** This transaction type applies to Alternative Investments, Limited Partnerships, Private Placements; not stock certificates and mutual fund certificates. Fields that may be used for

Transaction Type 07 = Physical Movement Settlement: Transfer Control Number; Alternate Control Number; Receiver/Deliverer Customer Account Number; Asset Category: require certain types?; Date Transfer was Initiated/Settlement Date of Transfer; Noncovered/Pending Indicator; Acquisition Date of Tax Lot; Tax Lot Current Cost/Tax Lot Original Cost [9/27/2011: this issue has been designated as lower priority. The security types applicable to this transaction type are not currently covered by the regulations.]

Closed Parking Lot issues

1. Which value is more important, the ACATS Asset Sequence Number, or the CUSIP? Closed 11/29/2011. On 11/29/2011, the committee discussed the question, if the ACATS Asset Sequence Number does not match the CUSIP on the CBRS record, which data element should the contra party use? The group decided that the ACATS Asset Sequence Number is the value to use in this case.
2. Should CBRACK be a valid firm type for other transaction types? Closed 09/20/2011. From minutes: Earlier this year a firm asked to join CBRS as a CBRS-only user to pass basis on ACATS transactions. CBRS does not allow type CBRACK to pass basis on an ACATS transaction, so this firm did not pursue this option. However, this situation led to the question of whether CBRACK should be a valid submitting/contra type for more transactions than it is currently valid for today. The committee discussed this issue, and decided against making CBRACK a valid type for additional transactions: allowing CBRS-only users to submit/receive for additional transaction types may cause more breaks. If an issue arises in the future for a specific CBRS user, the committee can revisit the issue at that time. For now the issue will be moved to the “Closed Parking Lot Issues” list.
3. Should the Deliverer Customer Account Number be required for all transactions? Closed 09/20/2011. The committee agreed on a Best Practice where if the receiver of the asset provides the Deliverer Customer Account Number on the asset transfer, the submitter of the CBRS record should provide it in CBRS. The number should not be required in CBRS: it will not always be available, and there are times when the submitter of the CBRS record is not willing to provide it. This issue is now closed, and will be moved to the “Closed Parking Lot Issues” list.
4. Mutual funds passing cost basis on 01 = ACATS transactions for fund-controlled assets. Closed 09/28/2011. The committee discussed that this is a problem related to a low volume of transfers. Various service bureaus are making changes to prevent firms from transferring mutual funds that are Level 4, fund-controlled assets, which will help to reduce the potential for a firm to receive cost basis from both a firm and a fund. There may be changes to ACATS-Fund/SERV files to help address this issue as well. Groups outside the Steering Committee are working on this issue, so this is a closed issue for this committee.
5. User CUSIP issue part 3, adding ACATS sequence number to CBRS record. Closed 10/04/2011. The committee agreed to add the ACATS sequence number to the CBRS record.
6. New fields needed to support the passing of cost basis on a gift denominated in a foreign currency. Closed 10/11/2011. The committee agreed to add this new field to the requirements for future CBRS enhancements: CBRS needs a new exchange rate field corresponding to the Fair Market Value (FMV) of the Date of Gift. A new currency code field is not necessary.
7. Best Practice about how to populate the deliverer/receiver customer account numbers for

mutual fund transfers. Closed 11/08/2011. This question came after of a discussion on the CBRS Working Group call. The question has not come up again, so this issue is currently closed. If customers revive the question, Lydia will bring up the issue again.

8. Remove Purchase/Dividend Reinvestment Indicator? Closed 2/7/2012. While the indicator is optional and not many CBRS users populate it, some users have said that they do use it, so the committee decided to keep the indicator on the record.
9. “Exchange Rate” field. Do we need to specify that this is the exchange rate for the Tax Lot Current Cost? Do we need another field for the exchange rate for the Tax Lot Original Cost? Would new fixed income cost fields (e.g. OID, bond premium) need exchange rates also? Closed 2/7/2012. The committee determined that the record layouts do not need new exchange rate fields. Lydia will add language to the comments for the existing ‘Exchange Rate’ field to clarify that the field corresponds to the Tax Lot Current Cost field and/or the Tax Lot Original Cost field.
